Recommended Pool Maintenance Checklist

- Daily
 - Check the area for broken equipment or vandalism.
 - Ensure that you can see the main drain clearly.
 - Check for stains or algae on the pool floor.
 - Visually inspect inlet and outlet covers.
 - Look for any other potential problems.
 - Use a skimmer net to remove leaves or debris floating on the surface.
 - Check that the water level is high enough for proper automatic skimming.
 - Empty and clean the skimmer baskets or gutters.
 - Record the chemical readings, along with water temperature and clarity.
 - Automated chemical controller:
 - Check and record readings.
 - Make sure disinfectant and pH dosing systems are functioning properly
 - Check the amount of chemicals available in feeders or the supply to metering pumps.
 - Adjust chemical and/or temperature levels as needed.
 - Record pump pressure and vacuum gauge readings.
 - Check and record the flow meter reading.
 - Clean the hair and lint strainer, if necessary.
 - Check that the valves in the pool circulation system are in the proper position.
 - Check and record filter pressure readings and backwash, if necessary.
 - Vacuum the pool, if needed.
 - Check the filter pressure gauges after vacuuming and backwash, if needed.
 - Check the deck for broken tiles or standing pools of water.
 - Remove any debris that restricts drainage.
 - Check slides or play features for broken stairs, loose fittings, or obvious hazards.
 - Put deck furniture in place and hose or wipe down, if needed.
 - Make sure safety equipment is in place.
 - Check waste containers, empty waste if needed, and place new liner bags.
 - Clean the changing rooms.
 - Disinfect benches, toilets, sinks, showers, countertops, and fixtures.
 - Check that there is ample soap and toilet paper.
 - Pick up any trash, debris, or misplaced items.
 - Check diving boards, ladders, slides, and similar items for loose bolts, missing pieces, damage, or hazards.
 - Clean the filtration and pump room and any other areas of the facility.
 - Check that fencing is secure and that self-closing gates (or doors) and latches work properly.
- Weekly
 - Scrub off the scum line.
 - Spray down or pressure wash and disinfect the surrounding deck.
 - Clean chemical feeders, metering pumps, tubing, and injection sites
 - Clean any automated controller sensor probes.
- As needed
 - Breakpoint chlorinate (shock) the pool, if needed.
 - Backwash the filter or clean the filter medium, if needed.
 - Lubricate pool circulation pump(s).
 - Service pool heaters, generators, HVAC units, and other mechanical equipment.
 - Inspect the sand in any sand filters.
