## RESOURCES

In addition to trainings organized in conjunction with the Southwest Utah Public Health Department, approved MRC trainings can be completed through:

- (C) Citizen Corps online classes at <https://www.ready.gov/citizen-corps>
- Dixie Regional Medical Center, Friday CME classes, Training Building at noon
- (F) FEMA online classes at <https://training.fema.gov/>
- (N) NIMS online classes at <https://training.fema.gov/nims/>
- (UT) U-Train online classes at <https://www.train.org/utah/welcome>

## TIERED SYSTEM FOR DEPLOYMENT

We realize that there are some of our volunteers who want to continue increasing their knowledge and skills, so we are also offering Intermediate, Advanced and Leadership Training to enhance your Medical Reserve Corps experience. Our Unit's goal is to educate and exercise in ways that will benefit you individually, as you interact with family and friends; and in serving the communities of our Southwest Utah five-county area. If you choose, this training can also augment your abilities to be deployed in other areas of the United States.

Training does not have to be accomplished in chronological order. However, recognition will only be given as each set of training and event participation in the previous tiers are completed.

Volunteers will be deployed in a disaster according to the following four tiers.

- **Tier 1** volunteers have completed all required Basic Training as listed, and have participated in at least one MRC event/drill in the past year.
- **Tier 2** volunteers have completed all required Basic and Intermediate Training, and have participated in at least two MRC events/drills during the past two years.
- **Tier 3** volunteers have completed Basic, Intermediate and Advanced Training and have participated in at least three events/drills during the past two years.
- **Tier 4** volunteers have completed all required Basic, Intermediate, Advanced and Leadership Training and have participated in at least four events/drills during the past three years.
