If you scored 5 or higher:

You're likely to have prediabetes and are at high risk for type 2 diabetes. Talk to your doctor to see if additional testing is needed. Usually a simple blood test (A1C) can find out what your glucose levels are.

You can also get a low-cost (\$25) A1C test at your local health department office. You can get results in a few minutes plus free resources for diabetes prevention and management (see contact information at right; appointment recommended).

It's possible with small steps to reverse prediabetes - and these measures can help you live a longer and healthier life.
